

Lab: Database Basics MySQL Queries

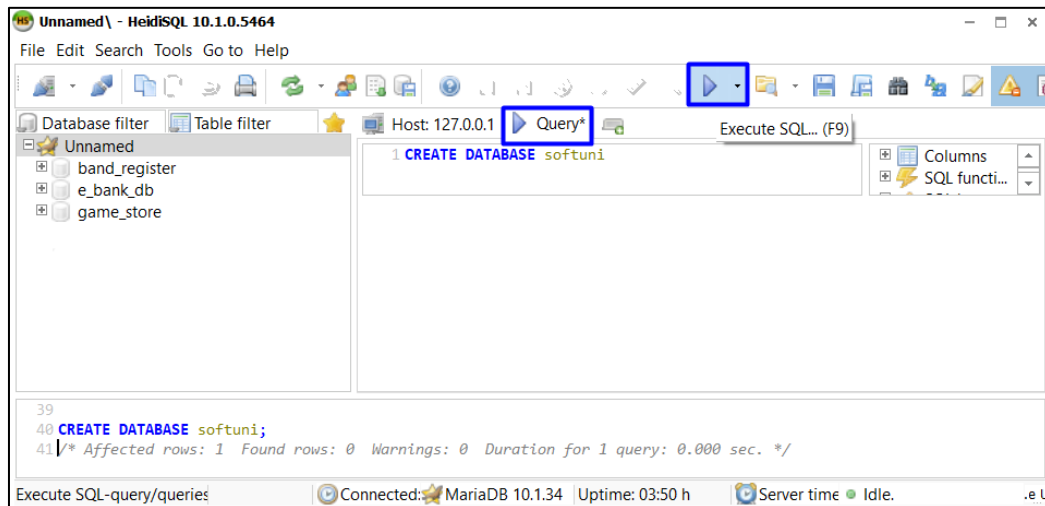

Problems for exercises and homework for the ["Programming Fundamentals" course @ SoftUni](https://softuni.org/).

Submit your solutions (source code) of all below described problems in the [Judge](#).

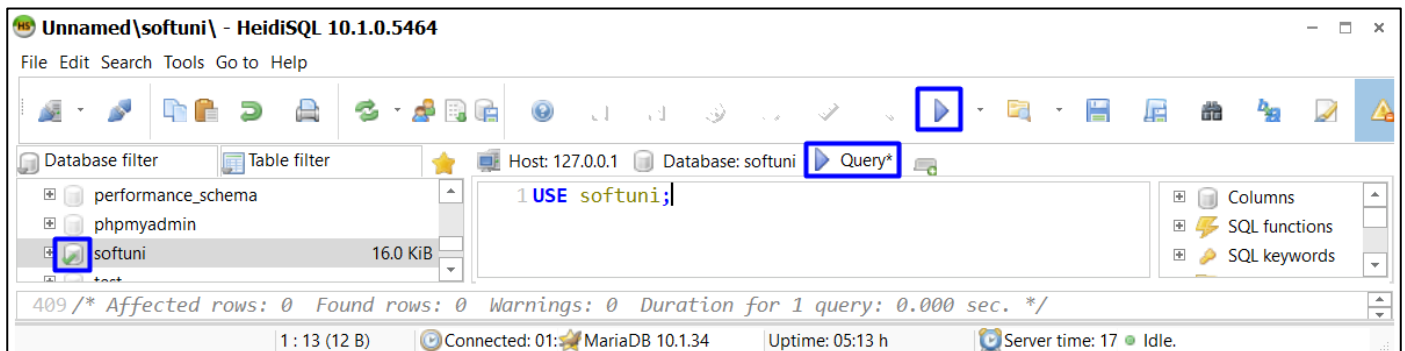

0. Create New Database

First start **HeidiSQL**. Then write a query that will create the **"softuni"** database.

Queries are written in the "Query" tab:

When we create database, we specify the database we want to use. This is done by using the **"USE"** clause:

1. Create Table

Submit your solutions in **JUDGE** without the **"USE {database name}"** row:

Using **HeidiSQL** in database **"softuni"** create table **"students"**. You should specify five columns:

- Name: **id**, Datatype: **INT**, Autoincrement, Primary Key
- Name: **first_name**, Datatype: **VARCHAR**, Max Length: **50**, Allow **NULL**: true
- Name: **last_name**, Datatype: **VARCHAR**, Max Length: **50**, Allow **NULL**: true
- Name: **age**, Datatype: **INT**, Allow **NULL**: true
- Name: **grade**, Datatype: **DOUBLE**, Allow **NULL**: true

2. Insert Data

Insert 6 recordings in "**students**" table.

Example

Id	first_name	last_name	age	grade
1	Guy	Gilbert	15	4.5
2	Kevin	Brown	17	5.4
3	Roberto	Tamburello	19	6
4	Linda	Smith	18	5
5	John	Stones	16	4.25
6	Nicole	Nelson	17	5.50

3. Find All Records

Write a query to find all records.

4. Find Last Name, Age and Grade

Write a query to find last name, age and grade of each student.

last_name	age	grade
Gilbert	15	4.5
Brown	17	5.4
Tamburello	19	6
Smith	18	5
Stones	16	4.25
Nelson	17	5.50

5. Find First 5 Records

Write a query to find first 5 records.

Id	first_name	last_name	age	grade
1	Guy	Gilbert	15	4.5
2	Kevin	Brown	17	5.4
3	Roberto	Tamburello	19	6
4	Linda	Smith	18	5
5	John	Stones	16	4.25

Find First 5 Last Name and Grade

Write a query to find top 5 records. Select only last name and grade.

last_name	grade
Gilbert	4.5
Brown	5.4
Tamburello	6
Smith	5
Stones	4.25

6. Truncate Table

Remove all records in "**students**" table.

7. Drop Table

Drop table "**students**".

8. Drop Database

Drop database "**softuni**".
